

# Page Prototype

## Step 1: Design an Event

### Competitor site 1: <YouTube>

- <I can see various contents on one page >
- <Thumbnails on the YouTube well describe what's the content is about >
- <There are various streaming features in YouTube, such as YouTube shorts, YouTube live, YouTube video>
- <The recommendation algorithms work very well, based on the content creators that I subscribed >

### Competitor site 2: <Twitch>

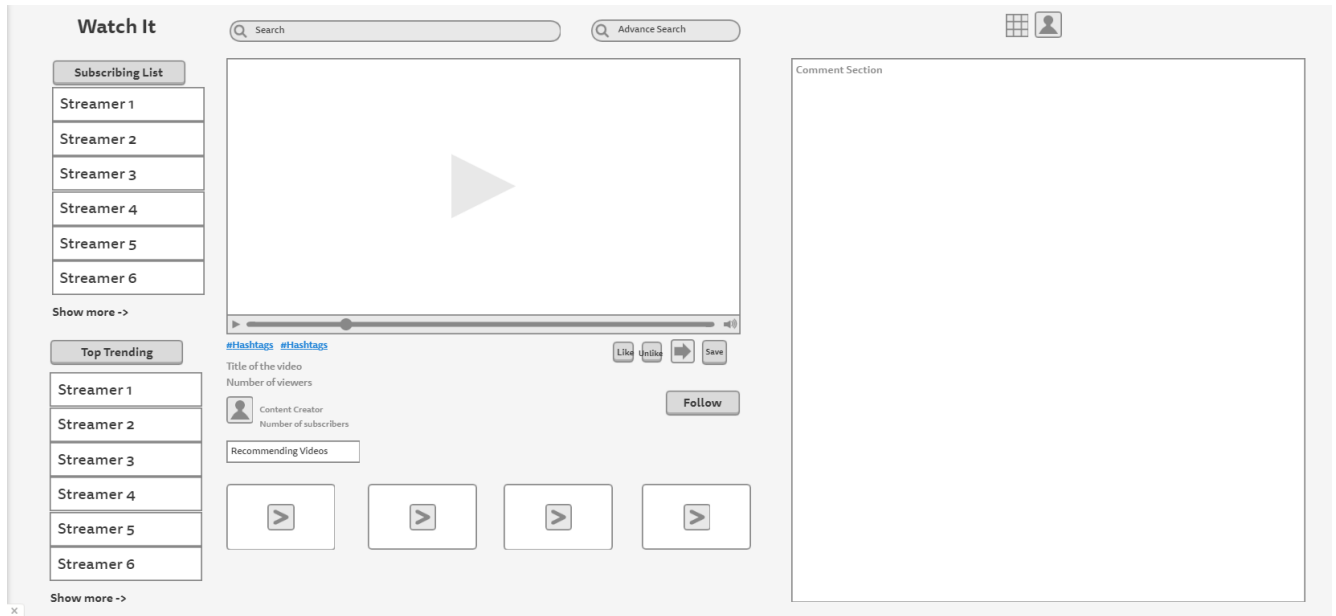

- <They focus only on synchronous live streams >
- <People who stream the live stream can actively have a conversation through chat>
- <Contents are nicely organized, can select one specific content, and deeply explore on them>
- <Live stream that I follow and subscribed are labeled on one side so I can easily find them>

### My site: <Watch It>

- <This website provides both video and live stream contents at the same time>
- <Contents are clearly organized, and you can easily find the videos and live stream by people that you have subscribed>
- <There is a separate search tool so that person can search their wanting contents>
- <Watch It provides a separate area where people can easily see who is the most popular content creator is, in one sight>

## Step 2: Prototype an Event Area

Here is a prototype of how the Event area will look

### Step 3: Prototype the Event Page

Here is a prototype that shows how the Event area fits in a wider page

<Paste a screenshot of your Thing To Do page here.>
